Jack 2.0 Released - NEW Google Currency Converter and lots more

Whats new in 2.0?

- * Google Currency Converter
- * You can now submit your own contributions to the 'Learn and get the most out of your Amiga' A-Z dictionary - GET INVOLVED NOW!
- * Using the keyboard will now give visual feedback aka buttons will depress and icons will toggle
- * Numerous bug fixes across the board and code optimisations
- * See the readme for a full list

What can I do with Jack

- * Download applications directly from OS4Depot using Jack's Appstore
- * Sign-up today and RATE your favourite software in the AppStore
- * Take screen shots
- * Crop, Rotate, add Watermarks and batch process your images
- * Quick Access to AmigaOS Preferences
- * Smart, tiny Commodity based window showing Weather Forecast for your location
- * Iconify the Commodity window to your desktop as well if you so wish
- * Spotlight-like calculator
- * Multiview-like launcher
- * Glorious full-screen slideshow mode, simply drag an image drawer over Jack
- * Interactive File Finder, delete, add comment or rename directly from Search Results or Export Search results
- * Word-Net Ready
- * JackTunes (coming soon)
- * Fully comprehensive File Manager which can even be called from the command line or used as a replacement to ASL requesters
- * Learn and get the most out of your Amiga - A-Z dictionary of Amiga technology and software recommendations

Thanks to everyone for your support, suggestions, bug reports and general feedback.

*AND FINALLY.. A user mentioned problems with changing their password - please PM me and confirm your email address so I can wipe your account so you can get going again. Sorry, I haven't dedicated time to see what caused this to happen. All I can suggest at this point is that you stick to

generic Alphanumeric characters in your password.
