@daxb

if you use that partition for HD recording, set the partition blocksize to 1024 with 1000 dosbuffers and without .recycled

Use SFSFormat with the NORECYCLED option

i.e:

```
SFSFormat DEVICE xxx: NAME foo NORECYCLED
```

Edit- btw just noticed this bit:

"I mentioned something strange. I add a partition (DH11) with HDInstTools 10 days ago"

have you always used HDInstTools for ALL partitions on that HD?
