As a donor I can just say that we waited for a long time now and I don't think that a couple of months more will damage anybody.

Let see what Marcin will do from now on (please Marcin, say something in this thread!).

An idea could be splitting the bounty amount in two: one for Marcin and the other for the MUI4 port. Having MUI4 available could fill the gap between MorphOS and OS4, and make more attractive/friendly our platform for MorphOS developers.

I personally already gave something to Joerg for OWB and I think that two browser are better than one, at least there will be a bit of healthy competition.

One last thing, we must be very elastic with Amiga bounties deadlines: developers aren't getting much money for their work, and their programming environment isn't friendly like in other nowadays OSs...
