Hello,

Are you in Facebook, Hi5, Twitter or other site?

How work Ibrowse for you if you try of accesss this sites?..

In personal experiense, with Facebook and Hi5, not good, becouse there change somethings and now you can enter the site, but many other things like modify status, or accept, friends, etc cant work properly.

With Twitter worki fine the Ibrowse!!..

Wich is your experiences with Ibrowse in this kind of sites?..

Best Regards
