OK. I got the file eventually after one whole hour watching it download but now cannot unpack the ISO from the lha archive.

I get the message

"Error while unpacking A1InstallCD-Upd1.lha filetype is unknown".

That is with Unarc, Dopus just shows and does nothing when I try to extract.

Anyone have any ideas what to do with this file or is it corrupted.

I really do NOT want to spend another whole HOUR waiting for a huge download that then may still not unpack.
