**You don't need to copy them to the system disk. Just add the line "Assign Add Fonts: Wordworth7/WwFonts" to user-startup. Same for the WW Libs, you only need to copy the Wordworth folder into EnvArc:.**

WwFonts does not contain the WW\_ fonts, and the digital libraries are not kept anywhere in the Wordworth Directory, so those assignments wouldn't achieve anything.

The fonts and Libs are installed to the system partition by Wordworth itself, so I left them there.
