CW is getting better and better.

Here's a bug i want to report:

- Starting CW
- Typing anything "bla blabla.."
- Clicking on "New Document" Button
- > Now Bug#1: CW does not asks me to save my stuff.

- Nevertheless typing again anything "bla bla bla bla blablabla" and clicking once again the "New Document Button"
- > Bug#2: Program crashes

Is it planned for CW to insert Images into the Document? Combined with CW's nice PDF export it would be great.

Thanks for your support.
