Thanks for the observation, I will look into the issues you have found.

Regarding future versions I indeed do plan to add support for insertion of images and tables. I have compiled a little list of the major features I wish to add before reaching version 1.0.

0.70-> Spellchecking

0.80 -> Modern read/write capabilities (support for ODF or DocX)

0.90 -> Advanced layout options like tables, images and columns
