@Chris

I still get a crash (grey screen, lockup, even mouse pointer doesn't move) with this Netsurf on the following site:

[MyCokeRewards](#)

I did a fresh install of the cairo version. The crash doesn't seem as bad as before as I can now use the 'three fingered salute' to reboot. I believe I had to power off before.

One minor nit-pick. Is the program icon not included with the last two versions? I had to download V2.5 for an icon.

Thanks for your efforts.
