I couldn't agree more! Its the one thing I was dreading on seeing when returning to Amiga. When I left Amiga MUI was doing great stuff with file requesters - you know icons for drawers, icons for files... I know some people consider it just eye-candy - but hell come on this is 2011!

An ASL requester should resemble something like in MacOS, Windows Dialog boxes, whatever MorphOS has (idk what is btw ;p) or dare I say it ... Jack (of course instead written in C/C++ or E) - you know what I mean here - ASL 2011 should explicitly use Mason Icons throughout.
