@whose Quote:

What we should really talk about is a proper way of responding to the CloseScreen()-fail-case.

BUT NOT HERE. Please, I have politely asked TWICE already that this thread is only used for discussing the OS4 bug(s) that I have reported. You are spamming the thread with TOTALLY unrelated topic.

Thanks in advance.

Quote:

I tried to tell you and others, that CloseScreen() is working exactly as documented and expected

And no one in this thread has EVER disagreed, as far as I can see. (This is still off-topic though)
