Ah-ah thanks for the info

For paradox, the OWB version I had in beta testing since May/June worked very very well with MUI 3.9 WIP, then tons of new functionality added in MUI create new problems that was not fixed in meantime on OWB ...

I already reported most of them on bugtracker so i hope they will fixed soon (in OWB or in MUI doesn't matter) but still, browng the net with MUI OWB is an awesome experience 😊
