So you can open the bookmark/history panels without any problems (for example) ?

Ok I tried them and as expected big crash. However with quick links and bookmarks manager window + right-click menu (the latter available for both History and Bookmarks) it is a non-issue for the end user. Other DSI I got (not very often mind you) were all ignorable (such as the DSI you often get at AmigaNews when you hit "preview" ;)).

A threaded resolver would be nice though :)

P.S

Of course BIG Thanks to Denill & co. maybe the fact that there weren't as many thank you messages (as you would expect at least) has to do with kas1e threatening everyone (no thank yous!! just bug reports!!!) 😊
