my concerns are about the arexx port. I think i may start here to express them: i don't have fab's mail address right now.

In the docs (also of the morphos 1.9 version) arexx is mentioned a "SaveURL" is mentioned. An arexx port OWB.1 appears. The standard "help" arexx command (for MUI applications) does not work and the SaveUTL neither (not sure about this).

The arexx commands i used with joerg's OWB don't work.

Question: what can one expect ?
