I have apparently forgotten about this, but Annotate beta should give you a testcase if you open menu->Tools->Ed Exchange. This is where I found the problem.

<http://hem.bredband.net/deniil/>

So, what I would expect it to do, is to remember size and pos after I close it and open it again. I do not expect (nor want) it to revert to the size/pos given at creation time. Those are only default values.

Now let's hope I didn't make a workaround before I released the beta ;)
