Got it .. Anyway, that info from CrhisH that "Napalm has the same problem with difficulty under WinUAE (with JIT)." sounds interesting. Maybe TonnyW (author of winuae) can help here more, or Rachy (who do petunia for aos4, and who works now on ppc-jit for e-uae).

Also, if it happens on winaue and only with JIT, maybe for that purposes add napalm to black-list for JIT and check if without JIT all will be fine ? And if so, then Rachy can help imho here.
