Anyone use WebDAV and want to test new handler?

Author: : Chris

Date: : 2012/3/17 17:21:32

URL:

I have released a public beta of webdav-handler (updated, rewritten and revamped http-handler designed for WebDAV access only)

It is available here:

<http://www.openamiga.org/?function=viewfiles&projectid=63>

Any and all feedback welcomed.

If you have cPanel webspace you have the capability of creating WebDAV access. If you don't, sign up with one of the many providers such as <http://www.mydrive.net> (2GB of free space).

Notes:

1. there is no SSL support yet.
2. locks are faked, so sharing access with more than one machine probably isn't going to work properly.
