The idea of deposit the money in an account and it give interests is old even I though on it but here as with Pyapal account is the "confidence" that money arrives to programmer.

Now the only benefit for us with Paypal is that they don't fees for the transfer although they get their percentage of money donate, perhaps the bounty solution will be make an ONG or fundation as Nobel academy, to get two things tax relief for donors and that money doesn't miss..... in spain for example there are foundations with this vicious lost the donations...
