Alfki!, take your time, it's not a Grand Prix! 😊

The important is the final result, not the timeline and i'm sure you will got the best result without any internal or external pression 😊

Meantime we can continue our testing on the current 4.7.0, there are so many great things to test and use that we can enjoy it for years !

Just a curiosity: what version of "Qt5" are you porting right now ?

Recently, at the end of August a new 5.1.1 was released and according to the comment worldwide it seems pretty stable release 😊

Keep it up!
