That what i do:

```
-- debug kernel with munge + memguard
-- hard reboot
-- cd work:qt/demos/embeddeddialogs
-- stack 2000000
-- run embedded dialogs
```

And the hits galore from memguard. Check this out:

http://kas1e.mikendezign.com/aos4/qt/...d_dialogs_hits_galore.txt

Pretty possible it will works after they stops, but there is so much of them in loop, that visually nothing happens, just hits come out one by one to serial.

And there is something wrong with QtDemo/Games/Flickr Client.

To reproduce:

```
-- debug kernel with munge + memguard
-- hard reboot
-- cd work:qt
-- stack 2000000
-- run qtdemo
-- press "Demonstrations"
-- press "Flickr Client"
-- press "display"
```

It show somewindow without anything inside, and in serial log i have a looot of repats:

Quote:

```
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
```

```
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
pthread_self: 3
WaitSelect() returned error 13
task: 0x65afa5e0
```

If at this moment i press on close gadget in qtdemo window, then it closes , and bring me crash with such stack trace:
