What i hope to do in next year ? Well, we for sure will release dopus5, as well as i want to finish port of VPDF from morphos to aos4 , and report recent version of muiowb. At least, those apps are important enough for everyday's use. I also still working on some "big-fat" article for "hacking way" book, so hope it will be also published pretty soon. If time will permit , of course, bunch of fresh ports from os3, mos, aros, unix and win words , so some of you will cry "wtf, again ports ! where native apps?" :)
