That page work perfectly fine here, as 95% of the existent internet page everywhere in the world, seriously i can't understand how a 2010 WebKit rendering core can be so old for browse the net today, it's not old at all.

But sure we strongly need a recent port of Odyssey because our 1.9 is not rock stable for sure and even a bit slow on big pages (recent big portals in general) not to mention the video parts ...
