I just don't understand why you haven't at least uploaded the font cache script fix, ppl still hit that wall.

Because if i will upload it like that, all the ppl will think "woah, new version of muiowb!" , will dl it, and will realise that its only 1 letter fix in text file, and will think "blah, what a crap ! was it worth of uploading ?".

I can of course just fix it , and ask os4depot admins to just replace file, without making any fuzz about and without putting it on toppage like it fresh upload. Probably will ask if they can do so, and if yes, then yep.
