How about my suggestion of eDuke? Point of eDuke is not a because of duke 3d, it is three additional games wich would came possible. NAM/Napalm, WWII GI and Redneck Rampage

NAM/Napalm and WWII GI, eDuke supports them directly.

<http://www.jonof.id.au/build.games/nam>

http://wiki.eduke32.com/wiki/Building_EDuke32_on_Linux

Erampage is modified from eDuke, so after eDuke, eRampage would be piece of cake.
