+1 to everything, just origin have no time i assume to implement all of this and most of this problems just show ups after years only. I also can add few more bits:

-- replace utilitybase on os4coding link on main page

-- make a new area for all translations, like "text/translations" or whatever, where put all of the .ct/etc files

But annonimouse comments and not ability to deal with them by the author are bad. I assume crazy helgis will continue to comment on other uploads as he do lately.
