@ddni

Will try SDLBench (through SysMon, of course ;) ) this evening.

Just a thought, I tried 3 R9250 cards before.

Did yours is a 64 bits or 128bits version ?

Is yours, a "new" one ?

I tried, 2 new ones bought on ebay (red color), 64 and 128bits but the both were very slow and display was bad.

After that I bought an old one (green color) and it was really better.
