Updates of SMTube, QNetWalk and QSoloCards on OS4Depot

SMTube 1.8.5971

* Port of the latest 1.8 svn5971 revision to fix an auto-update problem for vevo music videos
Thanks to LLOYD 'Moizzerfan' Blommaert for the report

* Added a new parameter in the Amiga/PlayVideo.rexx to allow to move the console window.
Default still the same as before but I added a commented example

MPLAYER_CONSOLE = "1450/975/465/99" to put the console window in the bottom right corner of the screen.

TAKE CARE, this example works ONLY for 1920 x 1080 screen resolution.

If the dimensions goes outside of the screen, the REXX will fail to start.

* Updated Italian, German and French translations for new svn revision.

Thanks to Samir 'Samo79' for italian and Thomas 'TommySammy' Blatt for german

* Added svn revision number in the About window

http://www.os4depot.net/?function=show_video/play/smtube.lha

QNetWalk and QsoloCards

* Added nice icons from Thomas 'TommySammy' Blatt
