build odyssey with curl 7.30.0 : ignore ssl errors option still works as expected, will try 7.32.0 now

edit: build odyssey with curl 7.32.0 : ignore ssl errors option still works as expected, will try 7.33.0 now (so now we will get from what one problem starts, as after 7.33.0 no revisions released, just 7.34.0 which borks).
