However i dont't have that button on my SAM460ex

Maybe wrong install, steps are:

1. download script and put it to odyssey's script directory
2. run odyssey, go to "scripts", delete everything, and add youtube-center.js (and be sure you have tick "enable" for that script).
3. close script window, quit from odyssey
4. run odyssey, go to youtube : prefs button of yt-center should be there.
