DSI in pthreads when stack trace have words about curl and ipv4 resolve, still mean that curl still borks even with joerg's changes. I have from time to time them too and do not know how to fix it. Probably some safeguards should be added somewhere, dunno. I can upload anywhere curl code with joerg's changes, and anyone can check amigaos4 ifdefs and see if he can come up with idea what can be done.

@Tonyw

That welknown bug in the mui4r3 , download and install latest nightly of mui4 from muidev.de. Lately, when Thore will release r4, i will add a minimum check on newer version of mui4 into odyssey, but currently just dl curent nightly of mui4.
