Problem Solved! This was driving me insane lol..what i did was assign my Fonts: to a parition that has jXFilesystem and moved Odyssey to that Partiton also same with Timberwolf because i could never get Timberwolf to load at all..anyways by doing that Timberwolf loaded! also when it started int fonts again it did that super fast! then 2nd launch was even faster! btw i was using SFS on my System4.1: Partition..

So all is good now :) when i get a chance i'm going to change my System4.1: over to jXFilesystem..

Thanks Guys for your Help :)
