@all

I just put on my website for registered users, a vote to know the type of your amiga, fill it because it will give me an idea whether I should optimize for small machines or not.

Then, I wanted to publicly thank the people who support me with their support and their donations.

For the latest information Fba OS4 donations helped buy me (to advance the development): PCI-Express 8x adapter pci to 133 MHz to fit a radeon graphics card pci, pci radeon 9250 a 128-bit 256 MB, 8x pci-e extension to add 3d support into the engine and develop other work, and a logitech joystick and joystick ps2 + ps2 to usb adapter.

Thank you again for your donations, because they motivate me and show that you are interested in my work, and the hours and days spent on this work are not in vain.

I want to end with this, since the beginning of my work, there is roughly 6 years, I get to number 46 donors knowing that in

Several "donor" remade successive donations. In the last thread, open it a week ago, I have more than 2500 "views" for dozens of users or reaction / comment, so I like to know if my work still interested and if I continue or is that the fact that I asked for my participation bookstore slows some? Thank you illuminate lantern, comment and criticism will / Welcome.
