\* Are you still interested in gaming projects from Huno?

Yes to try them out too see whats new etc.

\* Do you play Huno's game ?

I dont play much more then try games out. I do have ps4 for this but even there i dont play much, not near i used to in the 90s.

\* What could refrain you from playing or using Huno's games/apps ?

3D drivers for Radeon HD cards. Got tired of amiga whatever. But that can change sometime in future whenever that is.

Edit: Huno is doing a great job but i know his feeling. Maybe try and port some software that we lack and fill in the gap there :)
