I donated again 25 € to Huno for his important efforts in porting games, emulators and applications. personally I thought he got some credit from many Amiga users for his work, but I think that of course he should get, well deserved if you ask me. I bought the dvd game collection and a few more, this dvd I spend a lot of time and am very happy with the quality of this dvd is made. Final Burn is really great package i must get, i haven't tested it yet, but i usually wait until most bugs are gone (sorry). I still have not warp3d capable machine, so do not get to try everything. but think his work is very important and we hope he will continue with his magic.
