@Chris

Nice looking application! Now if I could only remember my password on the news server I use. (And I see that my attempt to add that server has disappeared since I last "saved" the configuration.)

Even stupider than that, I found out that I CAN indeed copy URLs from AmiCygnix to Odyssey. I guess I had never tried; I have found myriad difficulties trying to paste URLs in Odyssey, and not only from AmiCygnix, I'm pretty sure. In fact, attempting to copy to Odyssey can have very bizarre results.
