QSqlDatabase: QSQLITE driver not loaded

Author: : BSzili

Date: : 2014/12/19 7:26:06

URL:

I have the SQLite plugin in qt:plugins/sqldrivers, but according to the error message I don't have any drivers available:

Quote:

QSqlDatabase: QSQLITE driver not loaded

QSqlDatabase: available drivers:

I tried adding the path manually using many variations, but neither of these helped:

```
QApplication::addLibraryPath("/qt/plugins/sqldrivers/");
```

```
QApplication::addLibraryPath("/qt/plugins/sqldrivers");
```

```
QApplication::addLibraryPath("qt:plugins/sqldrivers/");
```

```
QApplication::addLibraryPath("qt:plugins/sqldrivers");
```

Does anyone know how to get the SQLite Qt plugin to work?
