A little update of ClipGrab is available on OS4Depot and AmiUpdate

Update 31 march 2015:

* Removed tmp: assign

* First AmiUpdatable update

@alfkil

If you work again on Qt when you will come back, maybe that you could fix the QDir::tempPath() function ?

On AmigaOS, as TMPDIR is not defined, it is equal to "/tmp". It should certainly be equal to "/T" for us.

For the moment take some "bon temps" in France !
