If you work again on Qt when you will come back, maybe that you could fix the QDir::tempPath() function ?

And also fix the native menu brokenness under OS4.1FE (see [http://www.amigans.net/modules/xforum ...hp?topic_id=6856&forum=38](http://www.amigans.net/modules/xforum...hp?topic_id=6856&forum=38))

Vive La France, etc.
