The last batch of Sam460ex boards and all the new Sam460cr come with the fan . Do you have the freezing if you boot from the OS 4.1FE CD ? As my (from the last batch) Sam460ex is quite stable running OS 4.1 FE (with cpu fan connected) I am more prone to suspect a hardware issue than an OS one especially when using a clean OS version when booting from the OS 4.1 FE CD.
