hmm, maybe your right. dopus5 is one of the most important program i have, so it may be the reason, but the freeze will come after 5 min or 10 min.. always within an hour, and i don't have to do any thing, not moving the mouse at all. this is a clean FE + 85% of the extra stuff the os4 come with. and maybe, mui and dopus5 was there, i can't remember.. but nothing more

in case of fire, i didn't use the same hardrive for FE, so i still have my ssd with os4.1.6 that still worked great. the new drive was a mechanical drive
