Hi gamers

Just bought this game, what a fantastic game! It supports LAN play but unfortunately not WAN play, spoke to people involved and they said if there is enough interest they would consider having s WAN play option.

It would be fantastic flying a bi-plane shooting down other Amiga enthusiasts me thinks lol.

We could have a score board to see who is best. This is the best Amiga game I have played in ages and I urge you to download the demo and give it a try and if you like it to buy it to help the developers, well worth it me thinks.

Available at Amedia Computer

AmigaKit are now stocking this game 😊

Sicky
